

Lab Guide 1: Installing Oracle VirtualBox

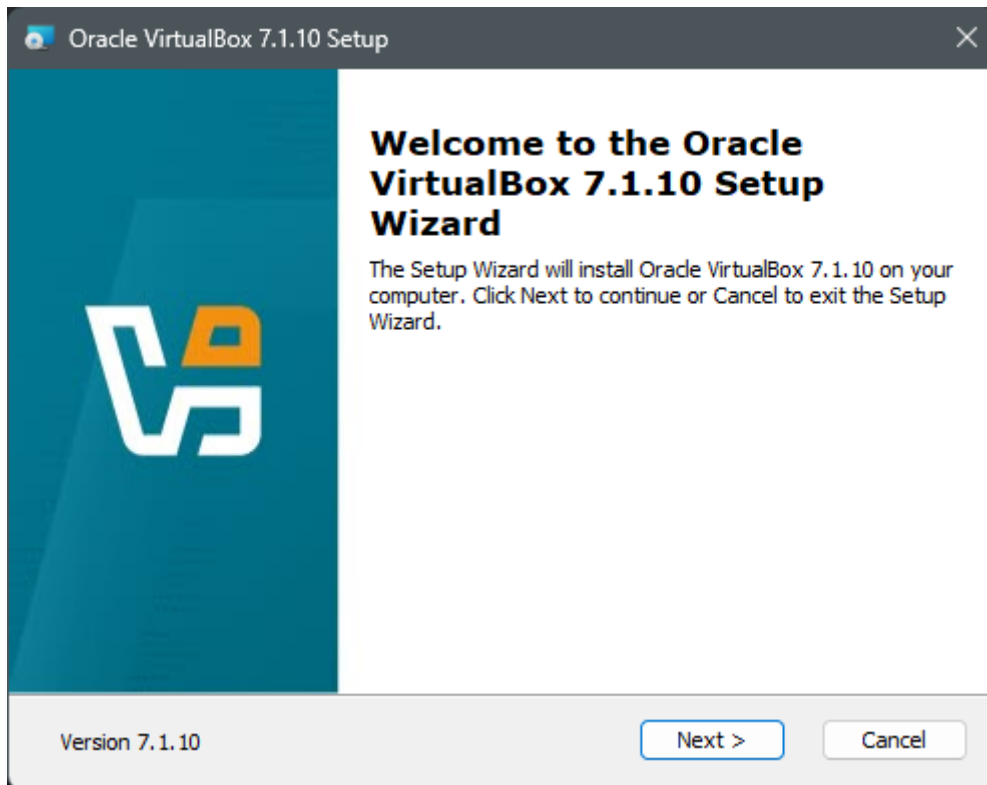

Step 1 – Download VirtualBox

1. Open a web browser.
2. Go to: <https://www.oracle.com/europe/virtualization/virtualbox/>
3. Select **Windows hosts** (or macOS/Linux if applicable).
4. Save the installer to your computer.

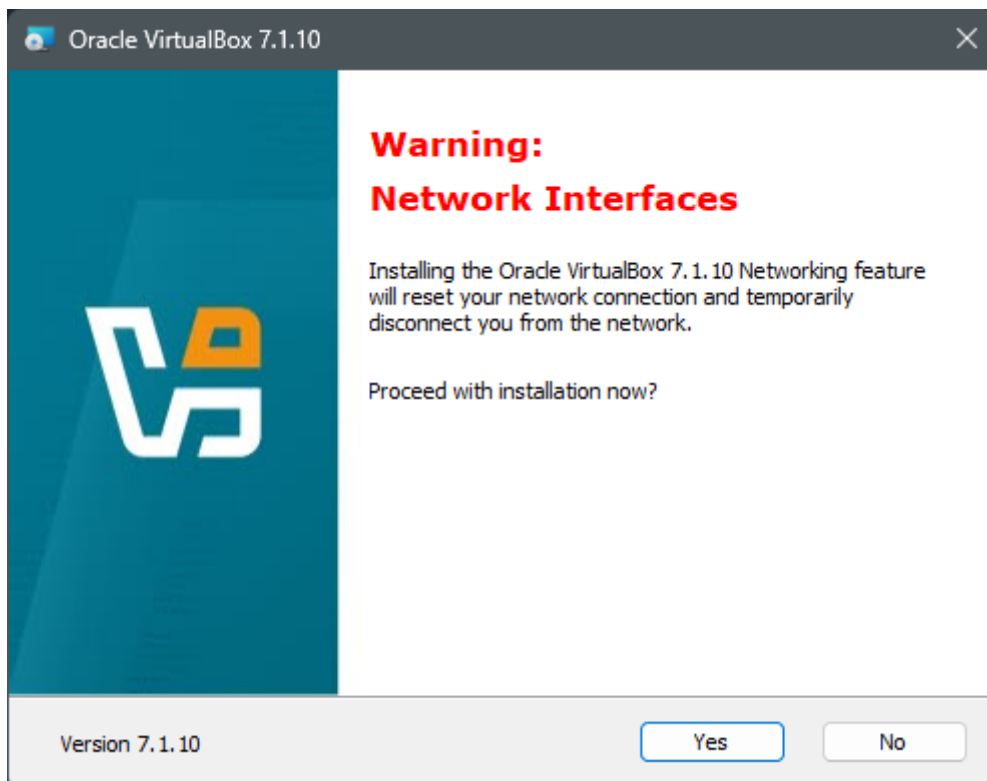

Step 2 – Run the Installer

1. Double-click the downloaded file (e.g., VirtualBox-x.x.x-win.exe).
https://download.virtualbox.org/virtualbox/7.1.10/VirtualBox-7.1.10-169112-Win.exe?source=:ow:o:p:nav:mmddyVirtualBoxHero_europe
2. Setup wizard steps:
 - Click **Next**
 - Leave installation path as default
 - Keep all features checked (USB, Networking, etc.)
 - Click **Next**

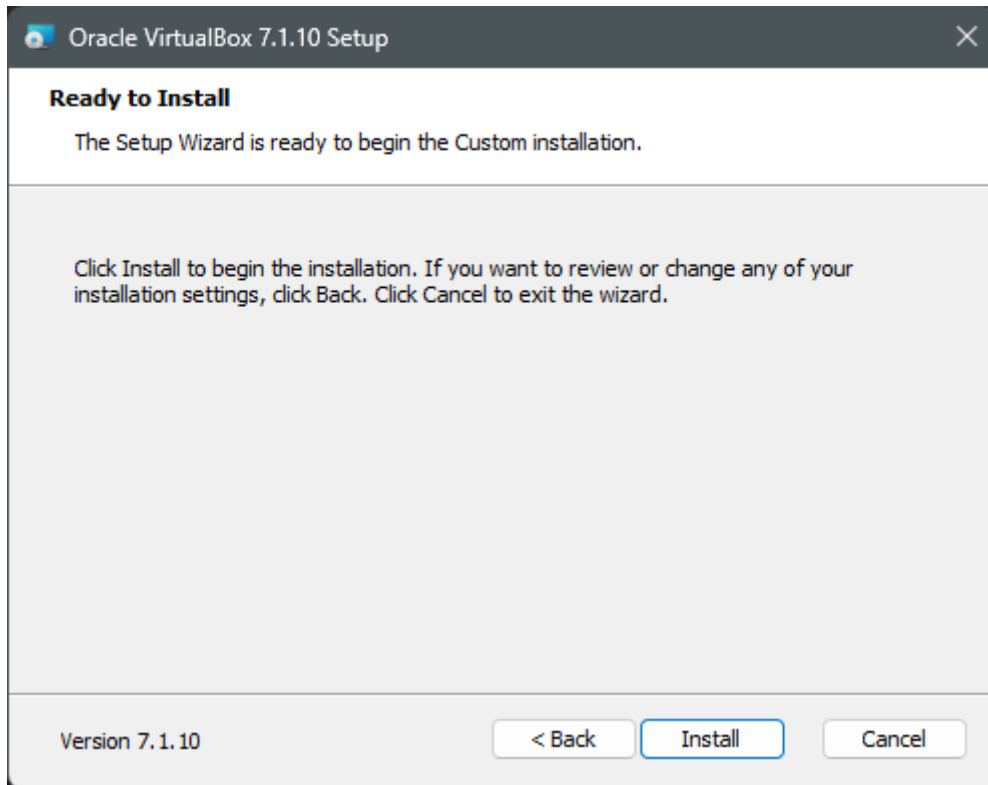

Step 3 – Network Warning

- A warning about resetting **network interfaces** will appear.
- Click **Yes** (this is expected).

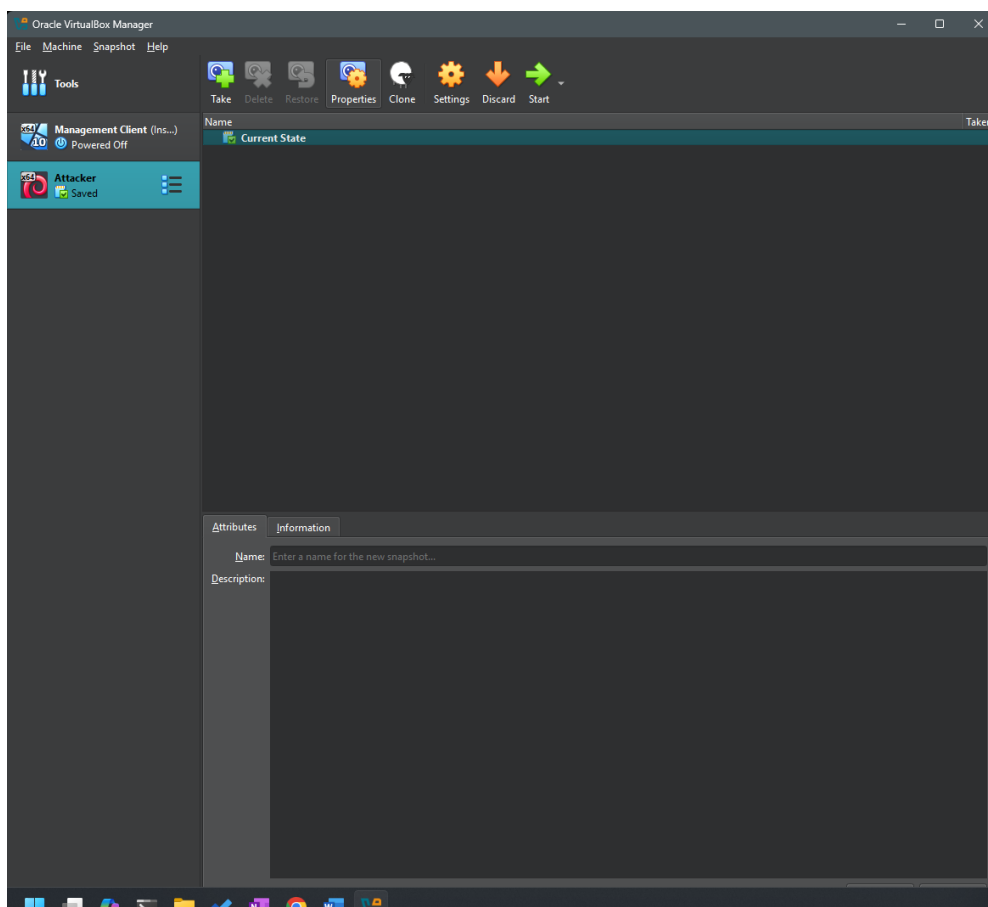

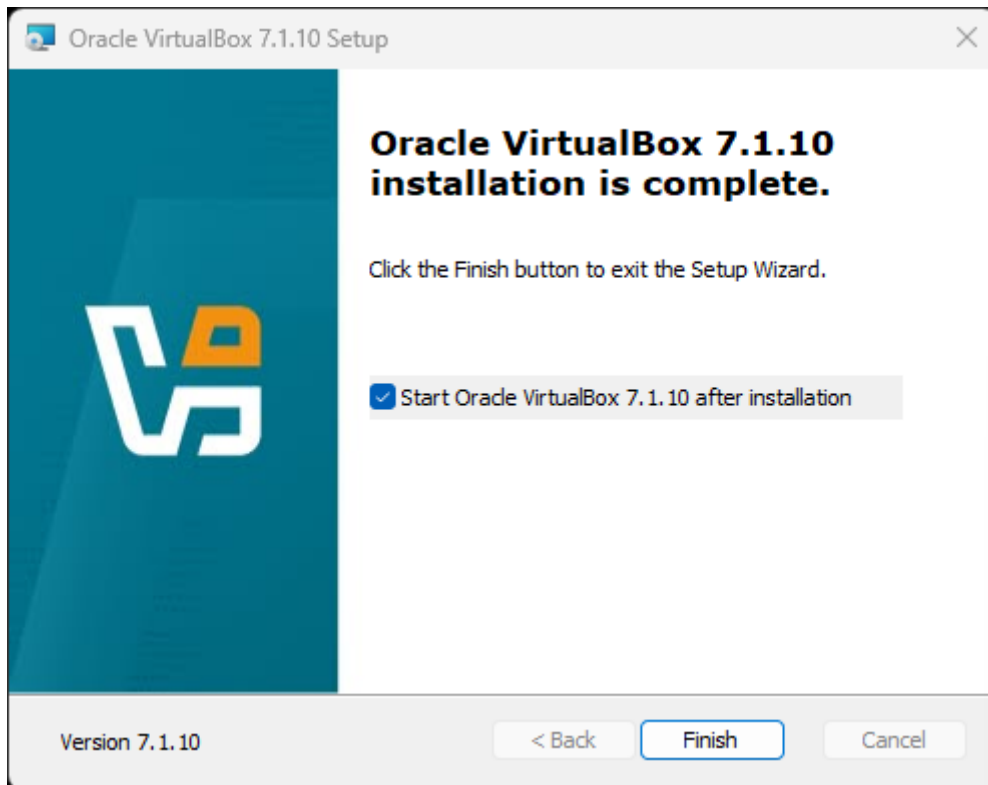

Step 4 – Install

1. Click **Install**.
2. Approve Windows permission requests (**Yes**).
3. Wait until installation completes.

Step 5 – Verify Installation

1. Launch **Oracle VM VirtualBox** from Start Menu.
2. Confirm version number at top (e.g., *VirtualBox 7.0*).
3. Optional: **Help** → **About VirtualBox** to double-check.

✅ Lab Complete! You are ready to create your first virtual machine.
